SLEEP SCIENCE EXP

innovation in sleep technology

Coming from the biopharmaceutical and nutraceutical industries, event giant MACE Media group introduces the Sleep Science Expo.

Health experts have megaphoned the benefits of powering down your digital devices hours before bedtime if you want to bank a solid night of zzz's. And yet, 2021 will be the year technology is welcomed into the bedroom to actually improve your sleep quality. From technology to create the optimal environment for you to snooze via temperature controls, data monitoring about your REM stats via trackers, and digitized beds for increased comfort, these products all aim to help you sleep better than ever.

"The appetite for products designed to improve sleep is very high," confirms tech news site, UKTN, which is why both funding and sleep-tech innovation in this category is taking off, too.

Why Should You Choose Sleep Science Expo?

The Sleep Science Expo is more than a display of the latest and most innovative sleep technology. It offers the highest level of sleep science education. Boasting a variety of specialty speaking tracks and sleep science education courses featuring PhDs, Physicians, Scientists, and Researchers from all over the world, The Sleep Science Expo is the place to gain valuable knowledge. Discover the cutting edge of research and medicine.
